PROFESSIONAL EXPERIENCE

2-Month Internship at KAIST (Korea Advanced Institute of Science & Technology) – South Korea *April – June 2025*

- Development of a **PyQt5 graphical user interface** for real-time visualization of **physiological data** (pMMG, EMG, IMU) for **exoskeleton control**.
- Implementation of a **logging system** and design of a **deep learning pipeline** with **TensorFlow/Keras** (RNN, GRU, LSTM, Transformer) for **classification** and **regression tasks**.

ACADEMIC PROJECTS

DEVELOPMENT OF A NO-CODE MEDICAL PLATFORM *Ongoing*

- **DevOps** development of a **no-code medical web platform** using **React (TypeScript)** with a **Java (Gradle)** backend, enabling the creation of **medical workflows** with multiple **dynamic forms**.
- Secure data and access management via **Firebase**, with a **Node.js (npm)** environment for **building** and **deployment**.

APPLICATION DEVELOPMENT *September 2024 – January 2025*

- Developed an **interactive web application** in **PHP** and **JavaScript** leveraging the **SYNOP API** to analyze **weather conditions**.
- Managed **data** from **French weather stations** using **phpMyAdmin** and a **MySQL database**.

CLIENT REQUIREMENTS IMPLEMENTATION *January 2024*

- Developed a **web application** in **Python** (**Flask, Pandas, Matplotlib**) to analyze **air pollutants** using **Airparif data**.
- Managed and visualized **air quality data** using **SQLite** and **DBeaver** for **environmental studies** in **France**.
