

Harry LAM

8 rue Charles de Gaulle 91330, Yerres • +33 6 47 30 51 55 • harrylam317@gmail.com • LinkedIn : [Hoang Anh Harry LAM](#) • Github : [LAM-Harry](#)

Data Analyst Apprentice at Qlower | MSc (Master of Science) Data Engineering & Artificial Intelligence Student at ESILV

PROFESSIONAL EXPERIENCE

AIFE (French Agency for Government Financial Information Systems) - Ministry of Action and Public Accounts

Noisy-le-Grand, France

Full Stack Development Internship

March 2026 – June 2026

- Industrialization of an Angular component library for the French government, integrating RGAA (French General Reference for Accessibility Improvement) requirements, ensuring accessibility across public applications.
- Delivery of POCs (Proofs of Concept) on public procurement and government purchasing platforms, demonstrating component adaptability and reusability across various application environments.
- Contribution to the Full Stack development of the ASTRA (Automated Regulatory Texts Assistant) project.
- Enhancement of a Figma plugin for centralized design token export and management, facilitating collaboration between designers and developers.

KAIST (Korea Advanced Institute of Science & Technology) – EXO-lab Research Laboratory

Daejeon, South Korea

Data Scientist Internship - R&D - Deep Learning

April 2025 – June 2025

- Design of a PyQt5 graphical interface, enabling real-time visualization of deep learning model training results from physiological data (pMMG, EMG, IMU) for exoskeleton control.
- Development of a classification and regression pipeline with TensorFlow/Keras, enabling the exploration and comparison of hybrid deep learning architectures (RNN, GRU, LSTM, Transformer) to identify the most performant ones.
- Implementation of a logging system, enabling analysis of training results and hyperparameter optimization to refine configurations and improve model performance.
- Evaluation of models using performance metrics, validating their robustness and identifying the architectures best suited to physiological data.

ACADEMIC PROJECTS

OLGA (Organized Logic & Governance for Actions) : Medical No-Code Platform

DevOps Project

September 2025 - June 2026

- Development of a no-code platform with React (TypeScript)/Spring Boot for creating medical workflows and dynamic forms, validated in real-world conditions (doctors, nurses, radiologists).
- Implementation of a MySQL database and secure Firebase authentication, managing user access based on roles and permissions.
- Containerization with Docker and deployment via Nginx, enabling the deployment of frontend and backend services.
- Automation of the development lifecycle with Gradle and npm, streamlining the integration and delivery of frontend and backend components.

Our'Atmos : Interactive Weather Application

Application Development Project

September 2024 - April 2025

- Development of a PHP/JavaScript web application using the SYNOP API to analyze weather conditions across major French weather stations.
- Management of weather station data with MySQL and phpMyAdmin, centralizing and structuring the collected data.
- Implementation of weather data visualization (temperature, pressure, precipitation), facilitating the analysis of climate data.
- Processing and caching of API data, reducing response times and improving application performance.

EDUCATION

MASTER OF SCIENCE - ESILV (ÉCOLE SUPÉRIEURE D'INGÉNIEURS LÉONARD-DE-VINCI)

Nanterre, France

Data Engineering & Artificial Intelligence

2026 - 2028

BACHELOR OF COMPUTER SCIENCE - UNIVERSITY OF PARIS-EST CRÉTEIL

Vitry-sur-Seine, France

Application Development Specialization : Design, Development, Validation

2023 - 2026

FRENCH BACCALAUREATE - FRENCH INTERNATIONAL HIGH SCHOOL OF MARGUERITE DURAS

Ho Chi Minh, Vietnam

Specializations: Mathematics, Computer Science - With Honours

2023

PROGRAMMING SKILLS

- Programming Languages** : Java, Python, C/C# languages, JavaScript/TypeScript, PHP, HTML, CSS/SCSS
- Web Development & Frameworks** : React, Angular, Node.js/Express.js, Spring Boot, Flask, PyQt5, Tkinter
- Database Languages** : PL/SQL, MySQL, PostgreSQL, MongoDB, Redis, Neo4j, Qdrant
- AI & Deep Learning** : TensorFlow, Keras
- DevOps & CI/CD Tools** : Docker, GitHub Actions
- Operating Systems & Networking** : Linux, Windows, Apache2, SSH, FTP / SFTP

SOFTWARE SKILLS

- IDE and Code Editors** : Visual Studio Code, Visual Studio 2022, CodeBlocks, Eclipse
- Database Software** : DBeaver, Oracle, phpMyAdmin, Firebase
- Virtual Machines, Containers & Cloud** : VirtualBox, Docker Desktop, AWS
- Project Management & Version Control** : Git, GitHub, GitLab

LANGUAGES

- French / Vietnamese** : Native languages
- English** : Professional level - **TOEIC Listening & Reading** (Score : 750/990)
- Spanish** : A2+ level (Elementary)

SOFT SKILLS

Creativity - Communication - Determination - Problem solving - Team Spirit - Organization (Agile methodologies: Scrum and Kanban)
